

Checking listing possible outcomes

Task A: Listing outcomes: one-stage or two-stage trials

1) There are two decks of cards.

Deck A (0 to 2):

0	1	2
---	---	---

Deck B (0 to 9):

0	1	2	3	4	5	6	7	8	9
---	---	---	---	---	---	---	---	---	---

a) Write down all the possible outcomes for drawing a card from Deck A.

0, 1, 2

b) Write down all the possible outcomes for drawing a card from Deck B.

0, 1, 2, 3, 4, 5, 6, 7, 8, 9

c) Write down all the possible outcomes for drawing one card from each deck.

00, 01, 02, 03, 04, 05, 06, 07, 08, 09,
10, 11, 12, 13, 14, 15, 16, 17, 18, 19,
20, 21, 22, 23, 24, 25, 26, 27, 28, 29

d) Describe the system that you used to list all of the outcomes in part (c).

E.g. Start with 0 from Deck A and 0 from Deck B.

Increase the value of the card from Deck B each time until they all have been used. Increase the value of the card from Deck A by 1 and then repeat the same process. (like with counting)

2) Here is a restaurant menu for two courses.

A customer chooses one starter and one main course.

a) List all the possible outcomes for a customer's meal.

SL, SR, SB, SP,
CL, CR, CB, CP,
ML, MR, MB, MP

b) Describe the system that you used to list all of the outcomes in part (a).

E.g. Start with item from each course.

Work through each main course item in order until reaching the end of the list. Move to the next item in the starter list and work through each item in the main course list again. Repeat until the final starter has been paired with every main course.

<u>Starters</u>	
soup	(S)
calamari	(C)
meatballs	(M)
<u>Mains</u>	
lasagne	(L)
ravioli	(R)
bolognese	(B)
pizza	(P)

Task B: Listing outcomes for three-stage trials

1) A flipped coin has two outcomes: 'heads' (H) and 'tails' (T).

Complete the list all possible outcomes for when a coin is flipped three times.
