

Summing probabilities

1 Two or more events are _____ if they share no common outcome. Tick **1** correct answer

- ☐ certain
- ☐ exhaustive
- ☐ impossible
- ☐ likely
- ☒ mutually exclusive

2 A set of events are _____ if at least one of them has to occur whenever the experiment is carried out. Tick **1** correct answer

- ☐ certain
- ☒ exhaustive
- ☐ impossible
- ☐ likely
- ☐ mutually exclusive

3 A standard six-sided dice is rolled. Which pairs of events are mutually exclusive? Tick **3** correct answers

- ☒ {odd, even}
- ☐ {prime, even}
- ☐ {factor of 6, multiple of 6}
- ☒ {6, lower than 6}
- ☒ {prime, square}

4 A standard six-sided dice is rolled. Which pairs of events are exhaustive? Tick **3** correct answers

{odd, even}

{prime, even}

{factor of 6, multiple of 6}

{6, lower than 6}

{prime, square}

5 When a set of events are all mutually exclusive and exhaustive, their probabilities sum to 1. Fill in the blank

6 The probability that a cone lands on its base is 0.1. What is the probability that the cone does not land on its base? Fill in the blank

0.9
