

Powers and roots using a calculator

- 1 _____ means to find the value of a numerical or an algebraic expression. Tick 1 correct answer

- ☐ Solve
- ☐ Figure out
- ☒ Evaluate
- ☐ Square root

- 2 Evaluate $\sqrt{64 + 2^3}$ Tick 1 correct answer

- ☐ 40
- ☐ 38
- ☐ 20
- ☒ 16

- 3 Use a calculator to evaluate 39.5^4 . Write all the digits from your calculator display. Fill in the blank

2 434 380.063

- 4 Use a calculator to evaluate $3.4^3 - 2.1^4$. Write all the digits from your calculator display. Fill in the blank

19.8559

- 5 Use a calculator to evaluate $\sqrt{76.7376 - 2.3^2}$. Write all the digits from your calculator display. Fill in the blank

3.47

- 6 Use a calculator to evaluate $3.4 \times 10^3 + \sqrt{4738 - 6.3^3 - 9.1^2}$. Write all the digits from your calculator display. Fill in the blank

3135.976132
