

Name: \_\_\_\_\_

## Listing multiples

---

1 Complete the statement. Factors and multiples are \_\_\_\_\_. Tick **1** correct answer

- ☐ always even
- ☐ always odd
- ☐ decimals
- ☐ inverse concepts

2 Given the calculation  $9 \times 2 = 18$ , select the correct statement: Tick **1** correct answer

- ☐ 9 and 2 are factors of 18
- ☐ 9 and 2 are multiples of 18
- ☐ 18 is a square number
- ☐ 18 is a factor of 9 and 2

3 Match the numbers with their factors. Write the correct letter in each box

|   |                    |
|---|--------------------|
| a | Factors of 12 are: |
| b | Factors of 10 are: |
| c | Factors of 24 are: |
| d | Factors of 5 are:  |

|  |                             |
|--|-----------------------------|
|  | 1, 2, 5 and 10              |
|  | 1, 2, 3, 4, 6, 8, 12 and 24 |
|  | 1, 2, 3, 4, 6 and 12        |
|  | 1 and 5                     |

4 List all the factors of 10 Tick **1** correct answer

- ☐ 1, 2, 5 and 10
- ☐ 10, 20 , 30, 40 and 50
- ☐ 1, 2.5, 2, 5 and 7.5
- ☐ Not possible as there are infinite number of factors of 10

5 List all the multiples of 10 Tick **1** correct answer

- ☐ 1, 2, 5 and 10
- ☐ 10, 20 , 30, 40 and 50
- ☐ 100, 10, 1, 0.1
- ☐ Not possible as there are infinite number of multiples of 10

6 Lucas is thinking about 12. He says "12 is a factor of 12 and 12 is a multiple of 12." Is he correct? Pick the correct justification. Tick **1** correct answer

- ☐ No, because multiples are always bigger than the factors.
- ☐ Yes, because  $12 \div 12 = 1$  and  $12 \times 1 = 12$
- ☐ No, because 1 is a multiple of 12
