

Securing understanding of sequences

1 What do we call the expression in a fraction, written below the fraction line? Tick **1** correct answer

- ☐ addend
- ☐ base
- ☒ denominator
- ☐ numerator
- ☐ variable

2 What is the next number in this sequence with a constant additive pattern? 5, 9, 13, 17, ... Fill in the blank

3 What is the missing number in this sequence with a constant multiplicative pattern? 2, 6, 18, 54, ... Fill in the blank

4 Match the calculation to the value it will find for the sequence ..., ?, 2, 10, ... Write the correct letter in each box

a	$10 \div 2$
b	10×5
c	$10 - 2$
d	$10 + 8$
e	$2 \div 5$
f	$2 - 8$

<i>d</i>	The next value in a constant additive sequence
<i>c</i>	The value being added in a constant additive sequence
<i>f</i>	The previous value in a constant additive sequence
<i>b</i>	The next value in a constant multiplicative sequence
<i>e</i>	The previous value in a constant multiplicative sequence
<i>a</i>	The multiplier for a constant multiplicative rule

- 5 Match these directed number calculations to their answers. Write the correct letter in each box

a	$(-12) + (-6)$
b	$(-12) \div (-6)$
c	$(-12) - (-6)$
d	$(-12) \times (-6)$
e	$12 \times (-6)$
f	$12 \div (-6)$

e	-72
f	-2
b	2
c	-6
a	-18
d	72

- 6 Match the answers to their corresponding fraction calculation. Write the correct letter in each box

a	$\frac{1}{2}$
b	$\frac{11}{10}$
c	$\frac{8}{3}$
d	$\frac{6}{25}$
e	$\frac{25}{6}$
f	6

f	$5 \div \frac{5}{6}$
c	$\frac{4}{5} \div \frac{3}{10}$
e	$5 \times \frac{5}{6}$
d	$\frac{4}{5} \times \frac{3}{10}$
b	$\frac{4}{5} + \frac{3}{10}$
a	$\frac{4}{5} - \frac{3}{10}$
