

Formalising a sequence

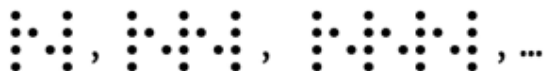

1 What do we call each value or pattern in a sequence? (Tick **1** correct answer)

- ☐ a constant
- ☐ an element
- ☐ an expression
- ☐ an object
- ☒ a term

2 Here is the beginning of a pictorial sequence with a constant additive rule. Which picture is term 5? (Tick **1** correct answer)

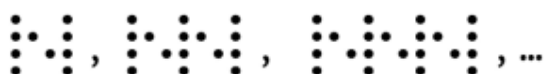

☐☒☐☐

- 3 Here is a sequence of connected 'N' shape patterns made out of dots. How many dots would there be in term 4 of this pattern?

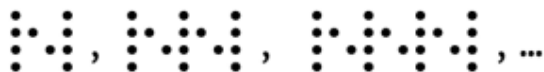

28

- 4 Here is a sequence of connected 'N' shape patterns made out of dots. Which of these could be a rule for the number of dots in each term? (Tick 2 correct answers)

- ☐ The number of dots increase by 4 each time.
- ☒ The number of dots increases by 6 each time.
- ☐ There are 6 dots per N shape.
- ☒ There are 6 dots per N shape add 4.
- ☐ There are 10 dots per N shape.

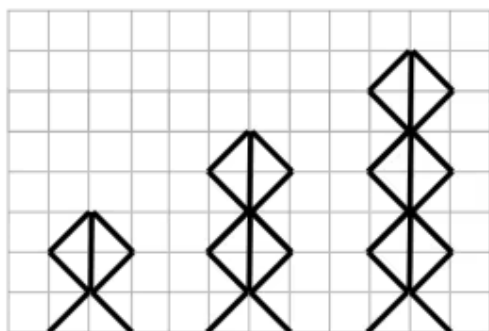

- 5 Here is a sequence of connected 'N' shape patterns made out of dots. How many dots would be needed for the 10th term?

64

- 6 For this pictorial sequence, match up the rule with the element of the pattern it is describing. (Write the correct letter in each box)

a	increase by 1 each time
b	increase by 2 each time
c	increase by 4 each time
d	increase by 5 each time

c	diagonal lines
a	vertical lines
d	total lines
b	height of the pattern in squares.
