

Preparing to solve two step linear equations

- The solution to the equation $x + 16 = 11$ is $x =$ _____. Fill in the blank
- The solution to $12x = -48$ is $x =$ _____. Fill in the blank
- _____ terms are terms that have the same set of variables and corresponding exponents. Fill in the blank
- Match each term with a like term. Write the correct letter in each box

a	$5x^2$
b	$3x^2y$
c	$2xy^2$
d	$7.5x$
e	$\frac{1}{4}y$
f	$-xy$

	$67x^2y$
	$-y$
	$2.3yx$
	$-\frac{1}{5}x$
	$3y^2x$
	$-3x^2$

- Fully simplify $5x - 9x + 3x - x$ Tick **1** correct answer

- ☐ $-8x$
☐ $-2x$
☐ $-1x - x$
☐ $6x$
☐ $18x$

6 Which of these is equivalent to $-4(2x - 5)$? Tick **1** correct answer

☐ $-6x - 9$

☐ $-8x - 20$

☐ $-8x - 5$

☐ $-8x + 5$

☐ $-8x + 20$
