

Name: _____

Understanding advertising

Task A: Comparing promotions

1) Use two different methods to show that packs of 6 rolls are better value for money than packs of 4 rolls.

4 pack of soft rolls
90 p

6 pack of soft rolls
£1.20

2) Aisha needs 500 g of mushrooms for a recipe which feeds 2 people.

Mushrooms 150 g
80 p

Mushrooms 400 g
£1.10

Mushrooms 600 g
£1.80

a) For each pack, what is the price per 100 grams?

b) What would be the cheapest way to buy enough mushrooms to feed 2 people?

c) What would be the cheapest way to buy enough mushrooms to feed 4 people?

d) What would be the cheapest way to buy enough mushrooms to feed 8 people?

3) Which of these promotions are good value for money? Explain your answer.

Pears
39 p each

3 for £1

Ice cream tubs
£5.30 each

Any 4 for
£21

Veggie
sausages
£2.30 each

Any 3
for £7

4) Lucas sees this promotion in a supermarket.

Fizzy orange
£1.80 each

Buy 1 get 1
half price

When I was in here last week
they cost £1.30 each but there
was no promotion.

Does this promotion offer a better deal than the price Lucas saw last week?

Task B: Unit pricing

1) Which of these unit pricings are correct?

a)

Strawberries (400 g) £1.89 £4.73 per kg

c)

Silverskin onions (440 g) 79 p 31 p per 100 g

b)

Twin pack Mango £1.79 89 p each

d)

Wrapping foil (20 m) 99 p 4 p per metre

2) Which of these is the best value for money?

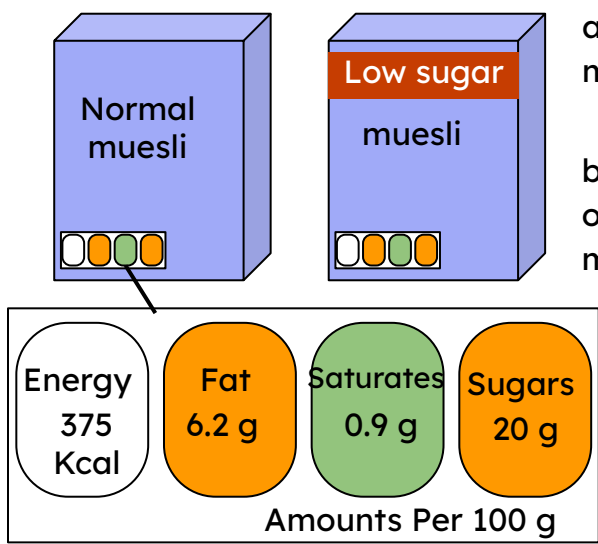

Crisps 6 pk × 25 g £1.25 0.83 p per gram
--

Crisps 4 pk × 30 g £1 25 p each

Crisps 15 pk × 30 g £3.80 £0.84 per 100 g

Task C: Analysing adverts

1) A ‘low sugar’ box of muesli advertises 20% less sugar.

a) How much sugar would be in 100 g of low sugar muesli?

b) If a teaspoon is 4.2 grams how many teaspoons of sugar are in a 30 gram serving of low sugar muesli?

c) A different brand of muesli advertises 5.5 g of sugar per 40 gram serving. Which muesli has the least sugar?

2) Roy’s rides makes and sells motorbikes. Their advert claims:

Our motorbikes hold their value much better than our competitors.

a) The average depreciation of the value of a motorbike in its first year is 20%. What would a motorbike worth £2500 new be worth after one year?

Here are the figures for the value of a motorbike from Roy’s rides and a motorbike from their nearest competitor.

	Roy’s rides
New	£1800
1 yr old	£1350

	Competitor
New	£5200
1 yr old	£4420

b) Give a statistic to support the claim made by Roy’s rides

c) Give a statistic which does not support the claim.
