Checking a claim

- 1 The probability that an event will occur is the proportion of times the event is expected to happen in a suitably large experiment. (Fill in the blank)
- 2 To estimate is to find a value that is close enough to the right answer, usually with some thought or calculation involved. (Fill in the blank)
- 3 The price of an item of clothing rose from £42 to £48. What is the percentage increase (1 d.p.) in the cost of this item?
14.3%
- 4 The price of an item of clothing fell from £48 to £42. What is the percentage decrease (1 d.p.) in the cost of this item?
12.5%
- 5 In a raffle there is a 1 in 280 chance of winning a prize. What is the probability of winning if you buy one ticket? Give your answer as a percentage to 1 d.p.
0.4%
- 6 In a raffle there is a 1 in 28 000 chance of winning a prize. Jacob thinks you can never win as the probability of winning is 0.0%. What error has Jacob made? (Tick **1** correct answer)
☐ Jacob is correct - you should never play as the probability of winning is 0.0%
☐ Jacob is incorrect - the probability of winning is actually 0.00%
☒ Jacob is incorrect - he has rounded to 1 d.p. so it looks like you can't win.
