## Checking understanding of basic transformations

---

- 1 A transformation is a process that may change the size, orientation or \_\_\_\_\_ of a shape. Fill in the blank
- 2 This L shape is flipped over once, which of these could be the image? Tick **2** correct answers

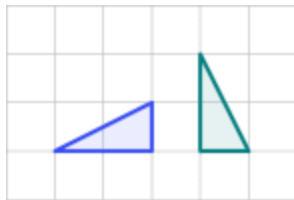

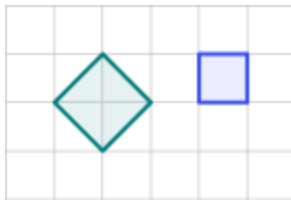

☐☐☐

- 3 The quadrilateral ABCD is transformed. How should the image of vertex A be labelled? Fill in the blank

\_\_\_\_\_

4 Which of these show a pair of congruent shapes? Tick **1** correct answer

☐

☐

☐

5 Regardless of whether an object is flipped, twisted or moved which properties are invariant? Tick **2** correct answers

☐

angles

☐

lengths

☐

orientation

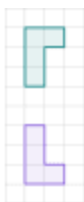

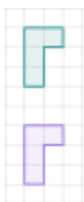

☐

position

☐

mirrored

6 Which figure does this description match: The object has been twisted half a turn. Tick **1** correct answer

☐

☐

☐
