

Describing a reflection

1 What is the purpose of a "line of reflection"? Tick **1** correct answer

- ☐ It cuts the object in half to become an image.
- ☐ It is in the middle of a shape.
- ☒ It defines the position of the reflected image.
- ☐ It defines the size of the reflected image.
- ☐ It defines the rotation of the reflected image.

2 What does the word "equidistant" mean? Tick **2** correct answers

- ☒ Two or more things that are an equal distance away from a reference point.
- ☐ When two points on an object are a distance away from the image.
- ☐ When two corresponding points are parallel to the x-axis or y-axis.
- ☒ When two corresponding points are an equal distance from the line of reflection.

3 Which pieces of information are needed to fully describe a reflection? Tick **3** correct answers

- ☒ state that it's a reflection
- ☐ show the orientation of each of its vertices
- ☐ describe how its sense will change
- ☒ state if it's a horizontal, vertical, or diagonal reflection
- ☒ describe the location of the line of reflection

- 4 Which of these coordinates are suitable for defining the location of the line of reflection for this reflection? Tick 2 correct answers

- ☐ (0, 9)
☒ (9, 3)
☐ (6, 3)
☒ (9, 10)
☐ (12, 6)

- 5 Complete this sentence for the following description of a reflection: "A _____ reflection with line of reflection passing through the coordinates (8, 6) and (13, 6)" Tick 1 correct answer

- ☐ horizontal
☒ vertical
☐ diagonal

- 6 The object is reflected in the line of reflection shown. Which point would be the correct location of the reflection of vertex A? Tick **1** correct answer

☐ b

☐ c

☐ d

☒ e

☐ f
