

Reflecting objects

1 Which of these properties change when an object is reflected? Tick **3** correct answers

☐ lengths of sides

☐ size of angles

☒ orientation

☒ position

☒ sense

2 Which of these things must you draw onto the tracing paper when reflecting using tracing paper? Tick **3** correct answers

☒ the object

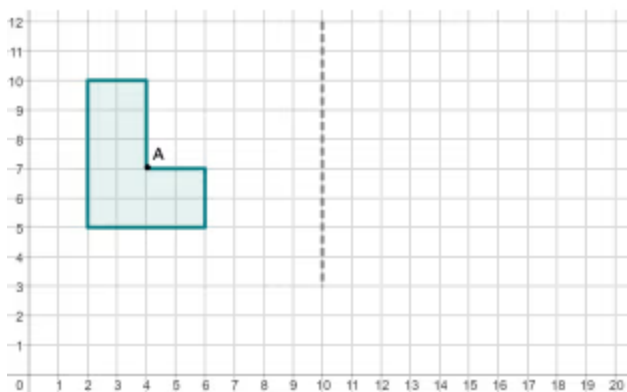

☐ the x-axis or y-axis

☒ the line of reflection

☐ an extra $\times$ marked on the object

☒ an extra $\times$ marked on the line of reflection

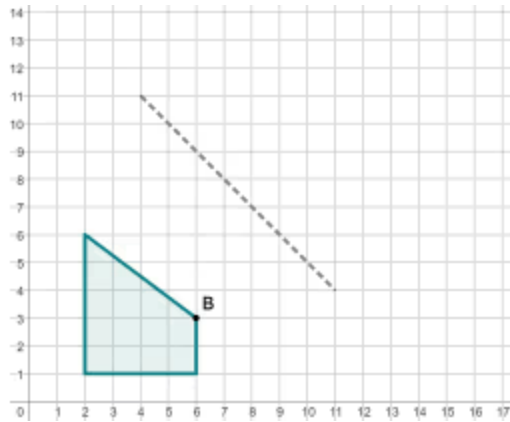

3 Write down the coordinates for the reflection of vertex A in the line of reflection drawn.
Fill in the blank

(16, 7)

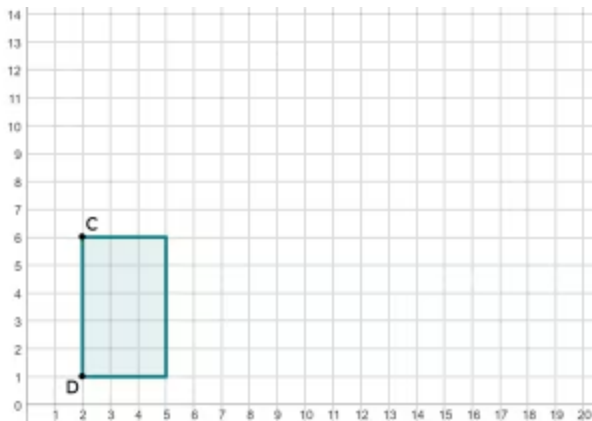

- 4 Write down the coordinates for the reflection of vertex B in the line of reflection drawn.
Fill in the blank

(12, 9)

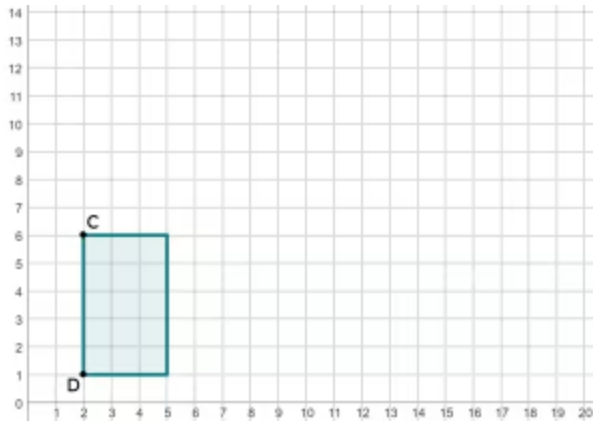

- 5 This object is reflected in a line passing through the coordinates (10, 0) and (10, 5). Write down the coordinates for the reflection of vertex C in the line of reflection. Fill in the blank

(18, 6)

- 6 This object is reflected in a line passing through the coordinates (0, 8) and (5, 3). Write down the coordinates for the reflection of vertex D in the line of reflection. Fill in the blank

(7, 6)
