

Describing an enlargement

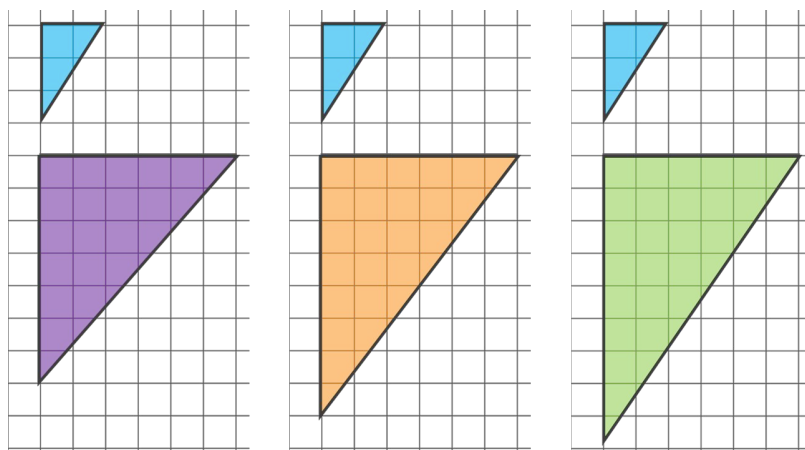

Task A: Using and finding scale factors

1. Parallelogram P has been enlarged to create A, B, C and D.

Calculate the missing lengths on each parallelogram.

2. Tick the diagram that shows a correct enlargement of the small triangle.

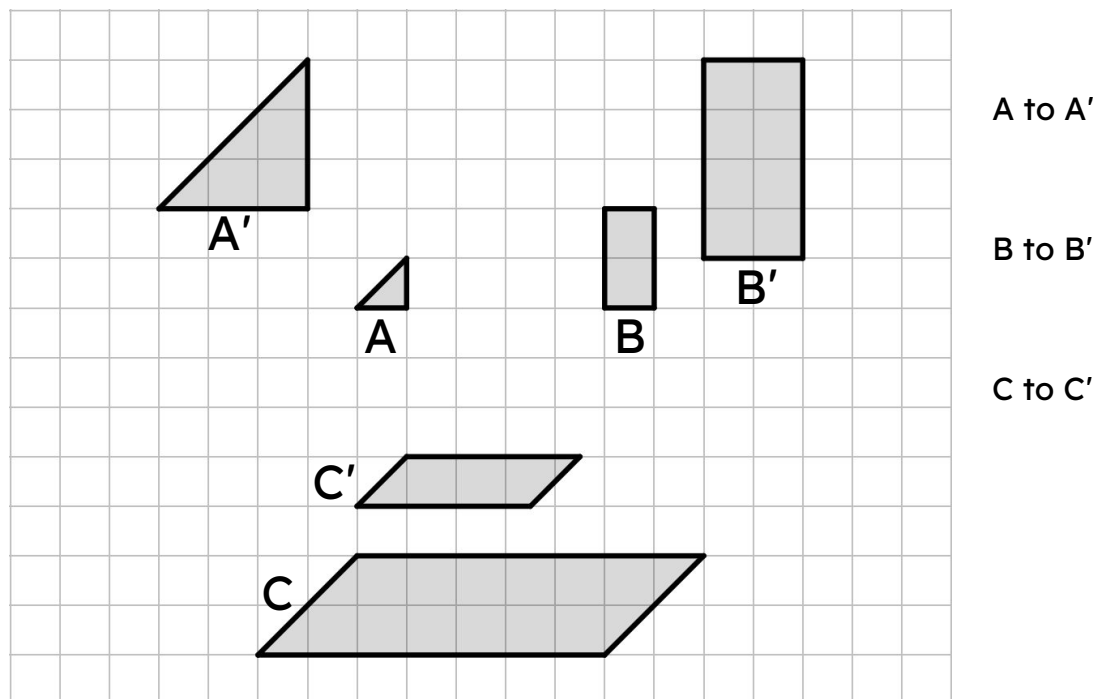

Sam draws another enlargement of the small triangle.

One of the lengths is 12 cm. What could the other length be?

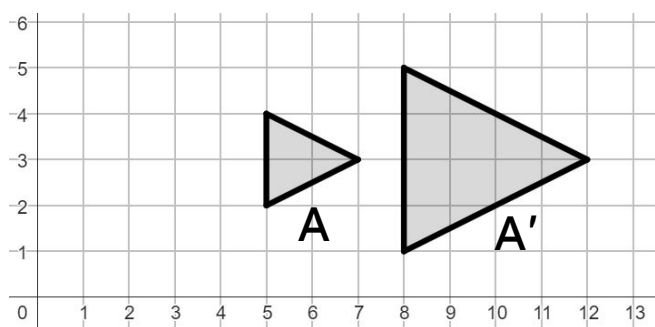

Task B: How the centre of enlargement affects the image

1. Tick the enlargements that have the same **centre of enlargement**.

2. Describe each transformation fully.

a) A to A'

b) B to B'
