

Enlarging objects

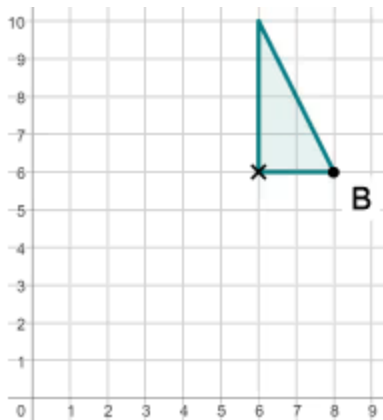

1 Which of these is NOT a method for enlarging an object? Tick **1** correct answer

- ☐ measuring with a ruler
- ☒ counting line length
- ☐ counting squares
- ☐ marking one point

2 When enlarging, an image and object can overlap. Tick **1** correct answer

- ☒ True
- ☐ False

3 The shape is being enlarged by a scale factor of $\frac{1}{2}$. The centre of enlargement is marked with a cross. What are the new coordinates of B? Tick **1** correct answer

- ☐ (16,6)
- ☐ (12,6)
- ☐ (8,6)
- ☒ (7,6)

4 When using lines to check the position of the image, the lines must Tick **2** correct answers

- ☒ go through the centre of enlargement
- ☐ go through all of the vertices of the image
- ☐ go through all of the vertices of the object
- ☒ go through all of the vertices of both object and image

5 When enlarging by a non-integer scale factor, the image is always smaller than the object. Tick **1** correct answer

- ☐ True
- ☒ False

6 Jun is enlarging an object by a scale factor of $2\frac{1}{2}$. If one of the object's lengths is 5, what will the corresponding length be in the image? Tick **1** correct answer

- ☐ $2\frac{1}{2}$
- ☐ 5
- ☐ $7\frac{1}{2}$
- ☒ $12\frac{1}{2}$
