

Transformed objects

- 1 The object is the starting figure, before a transformation has been applied. Fill in the blank
- 2 Which transformation changes the sense of an object? Tick **1** correct answer
- ☐ translation
- ☒ reflection
- ☐ rotation
- ☐ enlargement
- 3 When describing a rotation, you must state three things: the centre of rotation, the amount of turn and the direction of rotation. Fill in the blank
- 4 "When an object is enlarged, the image will always end up further away from the centre of enlargement." Select true or false and a justifying statement. Tick **2** correct answers
- ☐ True
- ☒ False
- ☐ you need to count the enlarged length from the centre of enlargement
- ☒ if the scale factor is between 0 and 1 lengths reduce. e.g. scale factor = $\frac{1}{2}$

- 5 A transformation has taken place in this diagram. Select all of the invariant properties.
Tick 2 correct answers

- ☒ lengths
☒ angles
☐ position
☐ orientation
☐ sense

- 6 Complete the descriptions below by matching the transformation with the detail needed to describe it fully. Write the correct letter in each box

a	A rotation
b	A reflection
c	A translation
d	An enlargement

d	by scale factor 3 from (0, 0)
b	in the x-axis.
c	by $\begin{pmatrix} -4 \\ 2 \end{pmatrix}$
a	by 270° clockwise about (3,4).
