

Introduction to translation

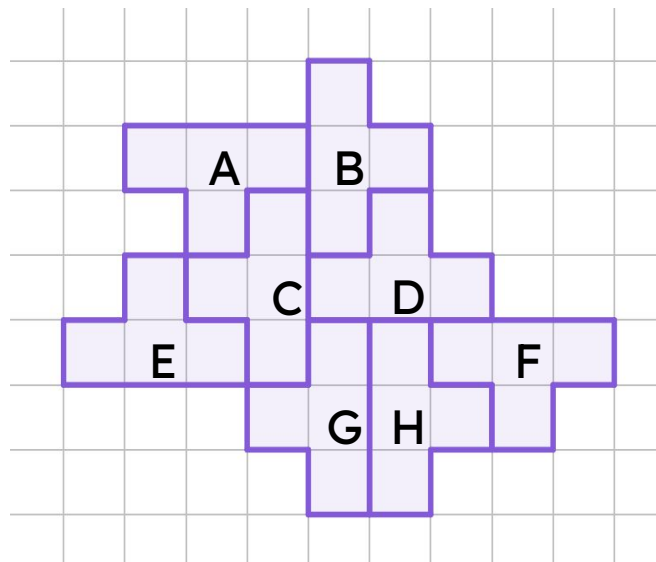

Task A: Translation

- 1) Draw four more copies of the shape so that they could be a **translation**.

Example of four you may have drawn.

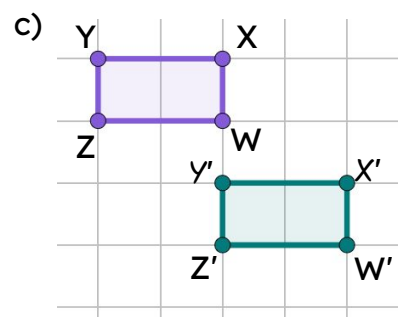

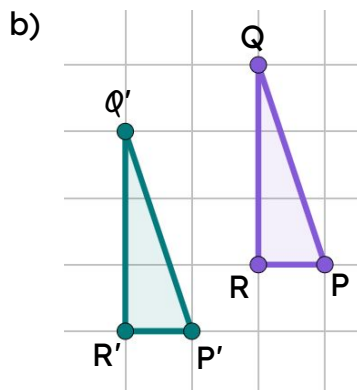

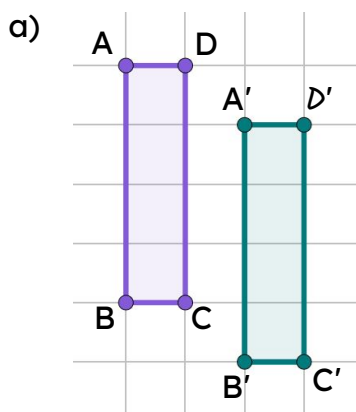

- 2) Write down the pairs that are a **translation** of each other.

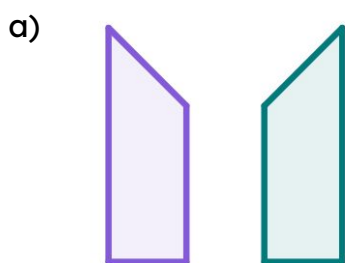

*A and F
B and H
C and G
D and E*

Task B: Orientation and position of the image

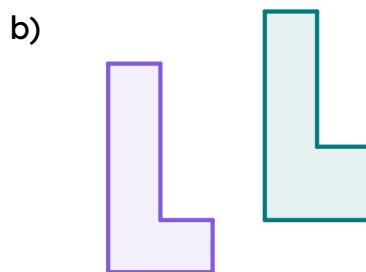

1) Complete the shape, so that a translation has taken place.

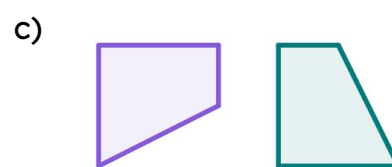

2) Identify which property of the image is incorrect for it to be a **translation**.

mirrored

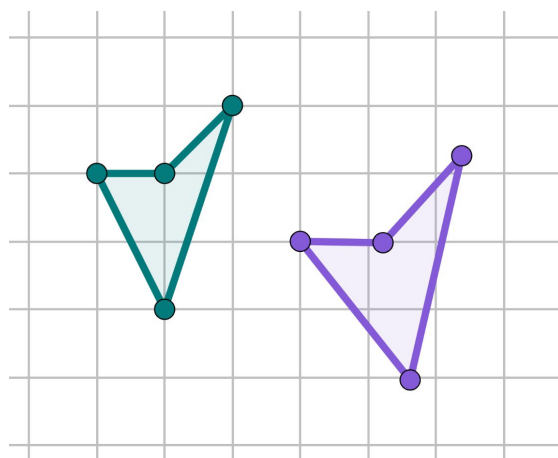

lengths

orientation

3) Complete the table and decide whether a **translation** has taken place.

Property	Changed - yes/no?
Lengths	<i>yes</i>
Angles	<i>yes</i>
Mirrored	<i>no</i>
Orientation	<i>no</i>
Position	<i>yes</i>

It is not a translation.
