

Introduction to translation

Task A: Translation

- 1) Draw four more copies of the shape so that they could be a **translation**.

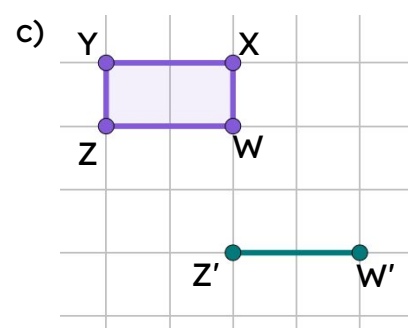

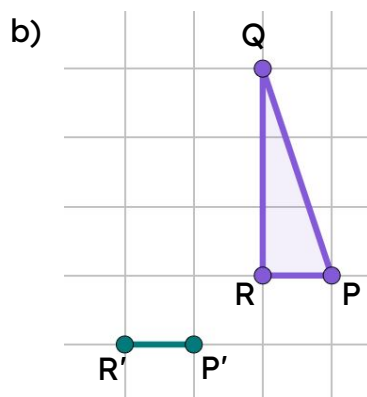

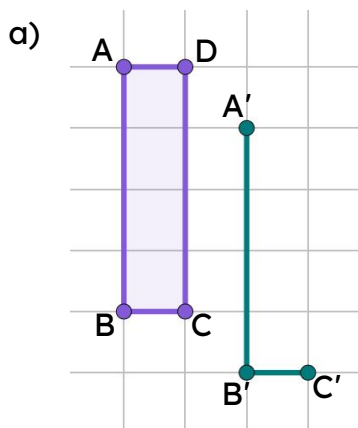

- 2) Write down the pairs that are a **translation** of each other.

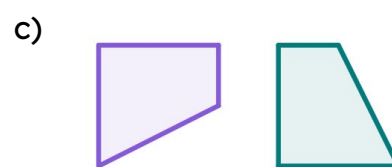

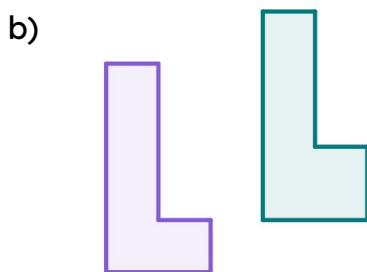

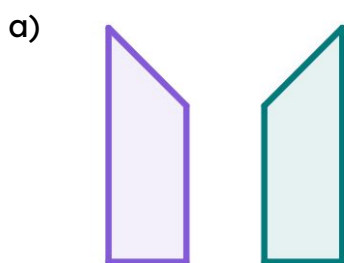

Task B: Orientation and position of the image

1) Complete the shape, so that a translation has taken place.

2) Identify which property of the image is incorrect for it to be a **translation**.

3) Complete the table and decide whether a **translation** has taken place.
