

Describing a translation

Task A: Describing a translation

1) Complete the description for each image.

a)

The object has been translated
_____ by _____ squares and
_____ by _____ squares.

b)

The object has been translated
_____ by _____ squares and
_____ by _____ squares.

2) Izzy has given an incomplete description of a translation.

The shape has moved across and down.

Write a full description for the translation shown.

3) Write full descriptions for the translations.

a)

b)

Task B: Vector notation

1) Match the description to the column vector.

Translated left by 5 and up by 3 units.

$$\begin{pmatrix} 5 \\ 3 \end{pmatrix}$$

Translated right by 3 and up by 5 units.

$$\begin{pmatrix} 3 \\ 5 \end{pmatrix}$$

Translated right by 5 and up by 3 units.

$$\begin{pmatrix} 5 \\ -3 \end{pmatrix}$$

Translated right by 5 and down by 3 units.

$$\begin{pmatrix} -5 \\ 3 \end{pmatrix}$$

2) Write a description using a column vector for each translation.

3) Given the coordinates of the object and image, describe the translation.

a) Object coordinate Image coordinate

(-2, 2) (3, 1)

(-2, -2) (3, -3)

(1, -2) (6, -3)

b) Object coordinate Image coordinate

(2, 6) (-1, 8)

(4, 3) (1, 5)

(5, 6) (2, 8)
