

Translating objects

- 1 An object is translated 4 right and 3 down. What number would be in the second position of the vector for this translation $\begin{pmatrix} 1^{\text{st}} \\ 2^{\text{nd}} \end{pmatrix}$? Fill in the blank

-3

- 2 The vector $\begin{pmatrix} -3 \\ 7 \end{pmatrix}$ shows the translation left by 3 units and up by 7 units. Fill in the blank

- 3 $\begin{pmatrix} 4 \\ 3 \end{pmatrix}$ is an example of vector notation. This type of notation can be used to describe a translation. Fill in the blank
