

Describing a rotation's direction and size

1 In which direction is this object being rotated? Tick **1** correct answer

- ☒ clockwise
- ☐ anti-clockwise
- ☐ the object is not being rotated

2 This arrow is currently pointing in the W (west) compass direction. If this arrow is rotated anti-clockwise, what is the first compass direction that it passes through? Tick **1** correct answer

- ☐ N (north)
- ☐ E (east)
- ☒ S (south)
- ☐ W (west)

3 Match the size an angle in degrees to its description. Write the correct letter in each box

a	90°
b	180°
c	270°
d	360°
e	720°

c	a three-quarter turn
d	a full turn
b	a half turn
e	two full turns
a	a quarter turn

4 Jun stands on the spot and rotates clockwise by a quarter turn, and then rotates clockwise by a further three-quarter turn. In total, how many degrees has Jun rotated by?
360 Fill in the blank

5 Jun stands on the spot and rotates anti-clockwise by an angle between three-quarters of a full turn and one full turn. Which of these is a sensible answer for the size of Jun's rotation? Tick **1** correct answer

☐ 30°

☐ 150°

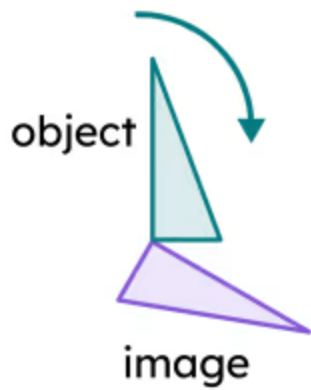

☐ 210°

☒ 300°

☐ 390°

6 Which of these is a suitable description for this rotation? Tick **1** correct answer

- ☐ Rotated anti-clockwise by 30° .
- ☐ Rotated clockwise by 45° .
- ☒ Rotated clockwise by 120° .
- ☐ Rotated anti-clockwise by 180° .
