

Introduction to reflections

1 When a vertex is labelled M' , it means the _____ of M. Tick 1 correct answer

- ☐ object
- ☐ sense
- ☐ centre of rotation
- ☒ image
- ☐ line of reflection

2 Which point on the image is corresponding to vertex A on the object? Tick 1 correct answer

- ☐ b
- ☒ c
- ☐ d

3 A transformation is a process that may change the size, orientation, or _____ of a shape. Fill in the blank

position

- 4 In which of these images is the orientation invariant when compared to its object? Tick **1** correct answer

image 1

image 2

image 3

image 4

☐ image 1

☐ image 2

☒ image 3

☐ image 4

- 5 In which of these images has the direction of the orientation reversed when compared to its object - where the direction of ABCD on the object is clockwise? Tick **1** correct answer

image 1

image 2

image 3

image 4

☐ image 1

☒ image 2

☐ image 3

☐ image 4

- 6 Which property may not be invariant when an object is rotated? Tick **2** correct answers

☐ length of a side

☐ size of an angle

☒ position

☒ orientation

☐ sense
