

Introduction to reflections

Task A: Understanding properties of reflection

- 1) In which of these images has the sense changed (due to **reflection**)?
- 2) For the non-**reflections**, state whether they are translations or rotations.

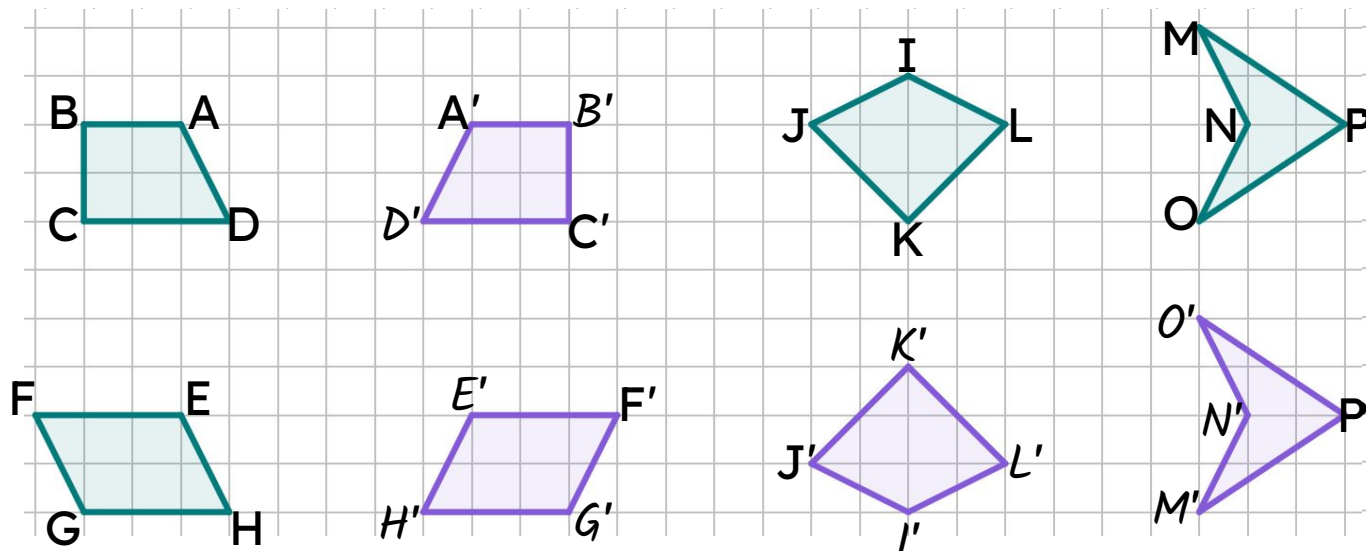

- 3) In which of these images has the sense changed (having been **reflected**)?
- 4) For the non-**reflections**, state whether they are translations or rotations.

Task B: Understanding properties of reflection

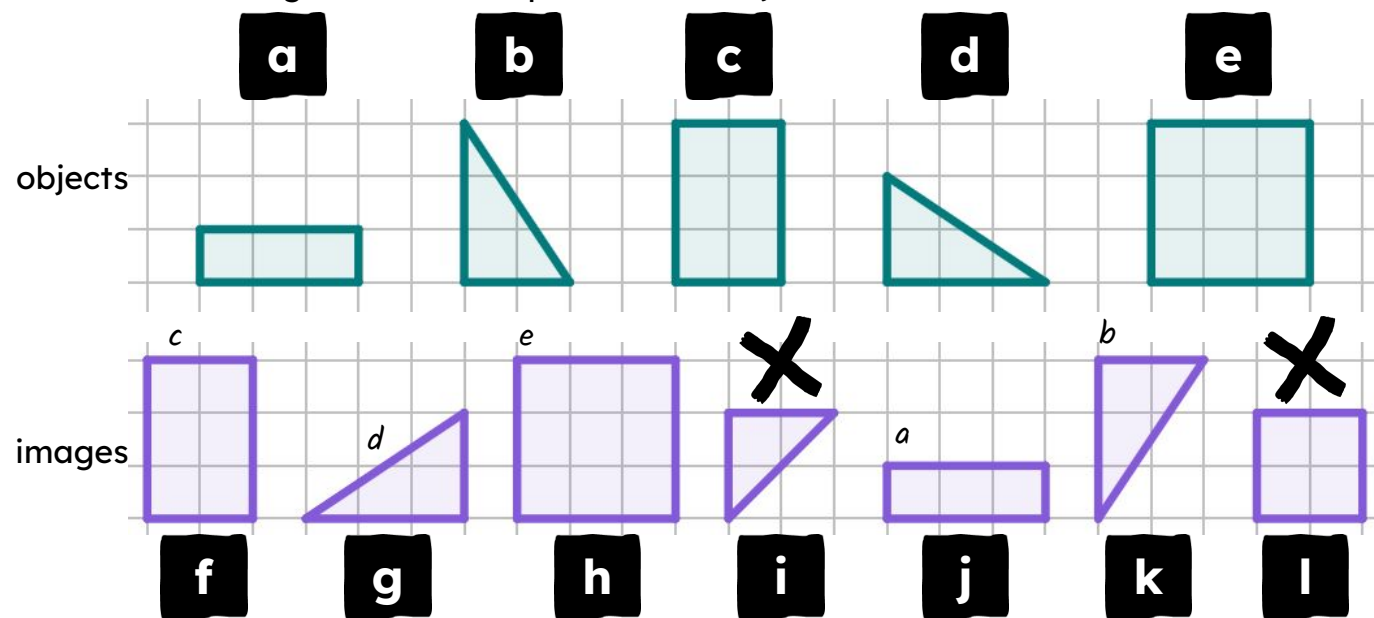

1) Each object has been **reflected**.

Complete the labelling of the vertices of each image.

2) Match the objects to their **reflections**.

There are two images that do not pair with an object.

3) Complete the table with ✓ to show the properties of **reflection**.

	Always Invariant	Usually Changes
Lengths of Sides	✓	
Size of Angles	✓	
Position		Always changes ✓
Orientation		Always changes ✓
Sense		Always changes ✓
