

Checking and securing understanding of similar triangles

1 What is the sum of internal angles of a triangle? Fill in the blank

180

2 Which of these is a property of an isosceles triangle? Tick **1** correct answer

☐

All angles are always equal

☒

Two angles are always equal

☐

All sides are different lengths

3 Which of these is a property of a right angled triangle? Tick **1** correct answer

☒

$$a^2 + b^2 = c^2$$

☐

All sides are equal in length

☐

They cannot be isosceles.

4 What are the sizes of the internal angles of a regular triangle? Tick **1** correct answer

☒

60°

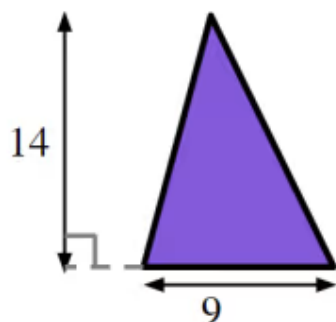

☐

50°

☐

90°

5 What type of triangle is this? Tick **1** correct answer

☒

Scalene

☐

Right angled

☐

Equilateral

☐

Isosceles

6 Match the angle types Write the correct letter in each box

a	Acute
b	Right angle
c	Obtuse
d	Reflex
e	Straight line

<i>d</i>	$>180^\circ$
<i>b</i>	90°
<i>e</i>	180°
<i>a</i>	$< 90^\circ$
<i>c</i>	$>90^\circ$ and $<180^\circ$
