

The unit circle

1 In a right triangle, if the hypotenuse is 37.5 cm and a second side is 30 cm, what is the length of the third side? (Use a calculator to help you.) Tick **1** correct answer

- ☒ 22.5 cm
- ☐ 34 cm
- ☐ 25 cm

2 Which of the following statements is true for these triangles? Tick **1** correct answer

- ☒ The triangles are similar.
- ☐ The triangles are not similar.
- ☐ It is not possible to know whether the triangles are similar or not.

3 An isosceles triangle has an internal angle of 50° , what might the other two angles be? Tick **2** correct answers

- ☒ 50° , 80°
- ☒ 65° , 65°
- ☐ 50° , 65°

4 In a right triangle, if the shortest sides are 36 cm and 48 cm, what is the length of the hypotenuse? (Use a calculator to help you.) Tick **1** correct answer

- ☐ 65 cm
- ☒ 60 cm
- ☐ 62 cm

- 5 Would a triangle ABC with sides $AB = 10\text{cm}$, $BC = 7.5\text{cm}$, $AC = 12.5\text{cm}$ be similar to the one shown in the diagram? Tick **1** correct answer

- ☒ Yes
☐ No

- 6 For this pair of triangles, can you determine whether they are similar without using side lengths? Tick **1** correct answer

- ☒ Yes, because their three angles correspond.
☐ No because you only know two angles.
☐ No, because you always need a side and two angles.
