

Scaling the right-angled triangle from the unit circle

1 In a right triangle, if the hypotenuse is 39 cm and a second side is 15 cm, what is the area? (Use a calculator to help you.) Tick **1** correct answer

☒ 270cm²

☐ 280cm²

☐ 294cm²

2 In a right triangle, if the hypotenuse is 125 cm and a second side is 75 cm, what is the length of the third side? (Use a calculator to help you.) Tick **1** correct answer

☐ 82cm

☒ 100cm

☐ 96cm

3 In a right triangle, if the hypotenuse is 22.5 cm and a second side is 13.5 cm, what is the perimeter? (Use a calculator to help you.) Tick **1** correct answer

☒ 54cm

☐ 56cm

☐ 58cm

4 In a right triangle, if the shortest sides are 22.5 cm and 30 cm, what is the length of the hypotenuse? (Use a calculator to help you.) Tick **1** correct answer

☐ 40.5cm

☒ 37.5cm

☐ 39.5cm

- 5 Would a right triangle ABC with side AB = 24cm, and hypotenuse AC = 30cm be similar to the one shown in the diagram? Tick **1** correct answer

- ☒ Yes
☐ No

- 6 For this pair of triangles, can you determine whether they are similar without using side lengths? Tick **1** correct answer

- ☒ Yes, they are not similar in this case as their angles are different.
☐ No because you only know two angles.
☐ No, because you always need a side and two angles.
