

Scaling the right-angled triangle from the unit circle

Task A: Labelling sides of a right-angled triangle

1) Label the sides of each triangle with the words '**opposite**', '**adjacent**' and '**hypotenuse**'. In parts (g) and (h), also mark the appropriate angle with θ .

a)

b)

c)

d)

e)

f)

g)

h)

Task B: Using sine and cosine from the unit circle

1) Use this sector of the unit circle to find the missing lengths on each triangle.

a)

b)

c)

d)

2) Use this sector of the unit circle to find the value of each unknown.

Task C: Using tangent from the unit circle

1) Use this sector of the unit circle to find the value of each unknown.
