

Sine and cosine ratios

- 1 Which side would we label as 'adjacent' to the non-right angle shown? Tick **1** correct answer

- 2 In a right triangle, if you are provided with θ and the adjacent side, which function would you use to find the hypotenuse? Tick **1** correct answer

- ☐ Sine
☒ Cosine
☐ Tangent

- 3 In a right triangle, if $\theta = 35^\circ$ and the opposite side is 4 cm, what is the length of the hypotenuse to the nearest whole number? Fill in the blank

7 cm

- 4 In a right triangle, if you are provided with θ and the opposite side, which function would you use to find the adjacent side? Tick **1** correct answer

- ☐ Sine
☐ Cosine
☒ Tangent

- 5 In a right triangle, if $\theta = 40^\circ$ and the adjacent side is 9 cm, what is the length of the hypotenuse to the nearest whole number? Fill in the blank

12 cm

- 6 In a right triangle, if $\theta = 50^\circ$ and the hypotenuse is 12 cm, what is the length of the adjacent side to the nearest whole number? Fill in the blank

8 cm
