

Sine and cosine ratios

1 In a right triangle, if the hypotenuse is 25 cm and a second side is 15 cm, what is the length of the third side? (Use a calculator to help you.) Tick **1** correct answer

- ☒ 20 cm
☐ 22 cm
☐ 19 cm

2 For this pair of triangles, can you determine whether they are similar without using side lengths? Tick **1** correct answer

- ☒ Yes, because their three angles correspond.
☐ No because you only know two angles.
☐ No, because you always need a side and two angles.

3 What is $\cos(60^\circ)$? Tick **1** correct answer

- ☒ 0.5
☐ 0.1
☐ 0
☐ 1

4 In a right triangle, if the shortest sides are 40 cm and 96 cm, what is the length of the hypotenuse? (Use a calculator to help you.) Tick **1** correct answer

- ☐ 100 cm
☒ 104 cm
☐ 108 cm

5 Which of the following statements is true for these triangles? Tick **1** correct answer

- ☒ The triangles are similar.
- ☐ The triangles are not similar.
- ☐ It is not possible to know whether the triangles are similar or not.

6 Would a triangle ABC with sides $AB = 32\text{cm}$, $BC = 24\text{cm}$, $AC = 40\text{cm}$ be similar to the one shown in the diagram? Tick **1** correct answer

- ☒ Yes
- ☐ No
