

## Using the sine ratio

---

- 1 Using triangle ABC, if  $\theta = 35^\circ$  and  $BC = 5$  cm, what is the length of the hypotenuse AB to 1 d.p. ? Fill in the blank

8.7

- 2 What value of  $x$  will produce the same result for  $\cos(x)$  and  $\sin(30^\circ)$ ? Tick **1** correct answer

☐  $30^\circ$

☒  $60^\circ$

☐  $90^\circ$

- 3 Using triangle ABC, if  $\theta = 40^\circ$  and  $BC = 4.8$  cm, what is the length of the hypotenuse AB to 1 d.p. ? Fill in the blank

7.5

- 4 What value of  $y$  will produce the same result for  $\sin(y)$  and  $\cos(26^\circ)$ ? Tick **1** correct answer

☐  $36^\circ$

☐  $46^\circ$

☒  $64^\circ$

☐  $54^\circ$

- 5 Using triangle ABC, if  $\theta = 50^\circ$  and  $AB = 12$  cm, what is the length of side BC to 1 d.p. ?  
Fill in the blank

9.2

- 6 Using triangle ABC, if  $\theta = 45^\circ$  and  $AB = 18$  cm, what is the length of side BC to 1 d.p. ?  
Fill in the blank

12.7
