

Using the sine ratio

- 1 Using triangle ABC, if $\theta = 35^\circ$ and $BC = 5$ cm, what is the length of the hypotenuse AB to 1 d.p. ? Fill in the blank

- 2 What value of x will produce the same result for $\cos(x)$ and $\sin(30^\circ)$? Tick **1** correct answer

☐ 30°

☐ 60°

☐ 90°

- 3 Using triangle ABC, if $\theta = 40^\circ$ and $BC = 4.8$ cm, what is the length of the hypotenuse AB to 1 d.p. ? Fill in the blank

- 4 What value of y will produce the same result for $\sin(y)$ and $\cos(26^\circ)$? Tick **1** correct answer

☐ 36° ☐ 46° ☐ 64° ☐ 54°

- 5 Using triangle ABC, if $\theta = 50^\circ$ and $AB = 12$ cm, what is the length of side BC to 1 d.p. ?
Fill in the blank

- 6 Using triangle ABC, if $\theta = 45^\circ$ and $AB = 18$ cm, what is the length of side BC to 1 d.p. ?
Fill in the blank
