

Using the tangent ratio

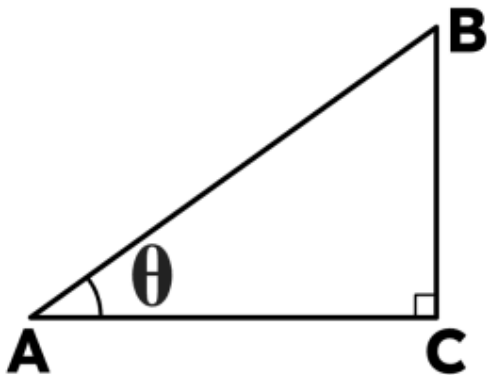

- 1 Using triangle ABC, if $\theta = 38^\circ$ and $BC = 14$ cm, what is the length of the adjacent side AC to 1 d.p. ? Fill in the blank

- 2 What value of y will produce the same result for $\tan(y)$ and $\cos(90^\circ - y)$? Tick **1** correct answer

- ☐ 0°
☐ 45°
☐ 90°
☐ 60°

- 3 Using triangle ABC, if $\theta = 18^\circ$ and $BC = 10$ cm, what is the length of the adjacent side AC to 1 d.p. ? Fill in the blank

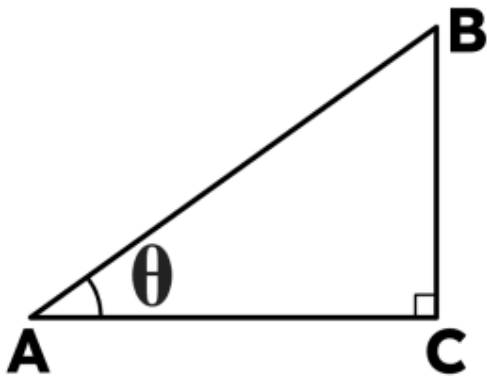

- 4 What value of y will produce the same result for $\tan(y)$ and $\cos(0^\circ)$? Tick **1** correct answer

☐ 0° ☐ 45° ☐ 90° ☐ 60°

- 5 Using triangle ABC, if $\theta = 26^\circ$ and $AC = 10$ cm, what is the length of BC to 1 d.p. ? Fill in the blank

- 6 Using triangle ABC, if $\theta = 35^\circ$ and $AC = 10$ cm, what is the length of BC to 1 d.p. ? Fill in the blank
