

Determining the whole

Task A: Bar models to solve ratio problems

1) Use a bar model to find the total amount.

2) Use a bar model to answer the following:

a) Andeep, Sam and Sofia share some sweets in the ratio 3 : 8 : 5
Sam gets 32, how many sweets are there in total? *64 sweets*

b) The lengths of the sides of a triangle are in the ratio of 7 : 6 : 4
The shortest length is 28 cm, what is the perimeter of the triangle? *119 cm*

c) The ratio of flour to butter to sugar in a cookie recipe is 3 : 2 : 1
You use 135 grams of flour, how heavy will the cookie be? *270 g*

Task B: Using ratio tables

1) Use a ratio table to find the total given either A or B and the ratio:

Ratio A : B	A	B	Total
1 : 3	9	27	36
2 : 1	36	18	54
3 : 8	48	128	176
4 : 5	180	225	405
2 : 5	600	1500	2100
7 : 3	84	36	120
2 : 9	845	3802.5	4647.5
4 : 7	27.2	47.6	74.8

You did not need to find the numbers in grey but they are shown here in case you did.

2) Use a ratio table to answer the following:

a) Andeep, Sam and Sofia share some sweets in the ratio 3 : 8 : 5

Sam gets 40, how many sweets are there in total?

80 sweets

b) The lengths of the sides of a triangle are in the ratio of 7 : 6 : 4

The longest length is 14 cm, what is the perimeter of the triangle?

34 cm

c) The ratio of flour to butter to sugar in a cookie recipe is 3 : 2 : 1

You use 126 grams of butter, how heavy will the cookie be?

378 g
