

Determining the part

Task A: Using a bar model to find one part

1) Use a bar model to find either A or B given the ratio:

Ratio A : B	A	B
1 : 3	6	18
2 : 1	18	9
3 : 8	12	32
4 : 5	52	65
2 : 5	12	30
7 : 3	84	36
2 : 9	96	432
4 : 7	100	175

2) Use a bar model to answer the following:

a) Andeep, Sam and Sofia share some sweets in the ratio 3 : 8 : 5

Sofia gets 15 sweets, how many do Andeep and Sam get?

Andeep = 9 and Sam = 24

b) The lengths of the sides of a triangle are in the ratio of 7 : 6 : 4

The shortest length is 12 cm, what are the lengths of the other 2 sides?

21 cm and 18 cm

c) The ratio of flour to butter to sugar in a cookie recipe is 3 : 2 : 1

You use 450 grams of flour, how much butter and sugar do you need?

Butter = 300 g and sugar = 150 g

Task B: Using ratio tables to find one part

- 1) Use a ratio table to find either A or B given the ratio:

Ratio A : B	A	B
1 : 3	9	27
2 : 1	36	18
3 : 8	48	128
4 : 5	180	225
2 : 5	600	1500
7 : 3	84	36
2 : 9	845	3802.5
4 : 7	27.2	47.6

- 2) Use a ratio table to answer the following:

a) Andeep, Sam and Sofia share some sweets in the ratio 3 : 8 : 5. Sam gets 40, how many sweets do Andeep and Sofia get?

Andeep = 15 and Sofia = 25

b) The lengths of the sides of a triangle are in the ratio of 7 : 6 : 4. The longest length is 14 cm, how long are the other sides?

12 cm and 8 cm

c) The ratio of flour to butter to sugar in a cookie recipe is 3 : 2 : 1. You use 126 grams butter, how much flour and sugar do you need?

Flour = 189 g and sugar = 63 g
