

Multiplicative relationships in context

- 1 Here is a ratio table showing how to make a smoothie. Select which of the following multiplicative relationships show this ratio. Tick **4** correct answers

Number of smoothies	Slices of apple	Slices of banana	Milk (ml)	Yogurt (ml)
1	8	4	100	200

- ☐ Number of smoothies $\times 8$ = Slices of apple
- ☐ Slices of apples $\times 0.5$ = Slices of banana
- ☐ Slices of banana $\times 25$ = Amount of milk
- ☐ Slices of banana $\times 50$ = Amount of yogurt
- ☐ Amount of milk $\times 0.5$ = Amount of yogurt

- 2 Here is a ratio table showing the ratio between eggs and sugar in a pudding. For every 2 parts eggs, there are 3 parts sugar in the pudding. Which of the rows is incorrect? Tick **1** correct answer

Eggs	Sugar
2	3
6	9
10	15
7	10.5
9	13

- ☐ 2 eggs and 3 sugars
- ☐ 6 eggs and 9 sugars
- ☐ 10 eggs and 15 sugars
- ☐ 7 eggs and 10.5 sugars
- ☐ 9 eggs and 13 sugars

- 3 Work out how many slices of apple are needed to make 12 smoothies if 8 slices of apple are needed for 1 smoothie. Fill in the blank

- 4 The ratio table can be used to make a cake. How many bananas are needed when 600 g of sugar is used? Fill in the blank

Cake	Flour (g)	Eggs	Bananas	Sugar (g)	Butter (g)
1	200	2	3	200	200

- 5 The ratio table can be used to make some cakes. Sofia uses 15 eggs to make some cakes for the school fete. Sofia should use _____ g of flour. Fill in the blank

Cake	Flour (g)	Eggs	Bananas	Sugar (g)	Butter (g)
1	200	2	3	200	200

- 6 The ratio table can be used to make some cakes. Andeep uses 1 kg of flour to make some cakes for the school fete. Andeep should use _____ eggs. Fill in the blank

Cake	Flour (g)	Eggs	Bananas	Sugar (g)	Butter (g)
1	200	2	3	200	200
