

Expressing multiplicative relationships as ratios and fractions

1 If two things are proportional then the ratio of part to whole is maintained and the _____ relationship between parts is also maintained. Tick **1** correct answer

- ☐ subtractive
- ☐ additive
- ☒ multiplicative
- ☐ inverse
- ☐ opposite

2 The ratio table shows a recipe for a pizza topping sauce. Complete this statement: Pizza sauce $\times$ 120 = Puree. Fill in the blank

Sauce	Puree	Garlic	Basil
1	120	4	2

3 The ratio table shows a recipe for a pizza topping sauce. Complete this statement: Garlic $\times$ 30 = Puree. Fill in the blank

Sauce	Puree	Garlic	Basil
1	120	4	2

4 A bowl of fruit contains apples and bananas. For every 3 apples, there are 5 bananas. There are 15 apples in the bowl. There are 25 bananas in the bowl. Fill in the blank

- 5 A box of fruit contains apples and bananas. For every 3 apples, there are 5 bananas. There are 80 pieces of fruit in total. How many bananas are there? 50 bananas. Fill in the blank
- 6 Which are equivalent ratios to: "For every 3 circles there are 5 squares." Tick 3 correct answers
- ☐ "For every 9 circles there are 14 squares."
- ☒ "For every 9 circles there are 15 squares."
- ☒ "For every 36 circles there are 60 squares."
- ☒ "For every 1.5 circles there are 2.5 squares."
- ☐ "For every 1 circle there are 1.5 squares."
