

Ratio language and notation

1 Match the equivalent ratios. Write the correct letter in each box

a	3 : 4
b	5 : 4
c	6 : 5
d	3 : 2
e	2 : 3

	12 : 10
	25 : 20
	9 : 6
	6 : 8
	12 : 18

2 There are _____ equivalent ratios. Tick **1** correct answer

- ☐ only 1000
- ☐ an infinite number of
- ☐ a finite number of
- ☐ a million

3 Match the ratio tables to the correct simplified ratio notation. Write the correct letter in each box

a)

A	B
2	3

b)

A	B
4	8

c)

A	B
4	4

d)

A	B
5	9

e)

A	B
3	1

a	a)		1 : 1
b	b)		2 : 3
c	c)		1 : 2
d	d)		5 : 9
e	e)		15 : 5

4 In a bag there are only triangles and squares. The ratio of triangles to squares is 4 : 1. There are 40 shapes in total. Who correctly worked out the number of squares? Tick **1** correct answer

- ☐ Alex "40 triangles, so there are 10 squares because of the ratio is 4:1"
- ☐ Laura "160 triangles, so there are 40 squares because of the ratio is 4:1"
- ☐ Sofia "32 triangles, so there are 8 squares because of the ratio is 4:1"
- ☐ Andeep "30 triangles, so there are 10 squares because of the ratio is 4:1"
- ☐ Jun "24 triangles, so there are 16 squares because of the ratio is 4:1"

5 The chocolates in a box either have red or blue wrappers. The ratio of red to blue is 3 : 4. If the difference between the red and blue chocolates is 5, how many chocolates are in the box? Fill in the blank

- 6 The chocolates in a box either have red or blue wrappers. The ratio of red to blue is $2 : 1$. Andeep eats 3 blue chocolates and now the ratio is $12 : 5$. How many blue were originally in the box? Fill in the blank
