

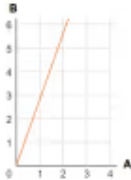

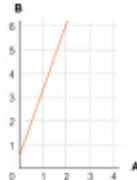

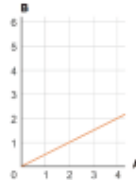

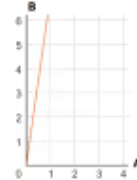

Graphing direct proportion

- Graphs showing direct proportion have a positive gradient with an intercept of 0. Fill in the blank
- Which of the following graphs does NOT show direct proportion? Tick **1** correct answer

☐

☒

☐

☐

- Which tables show that A and B are in direct proportion? Tick **2** correct answers

A	B
2	36
5	85

☐

A	B
2	15
5	37.5

☒

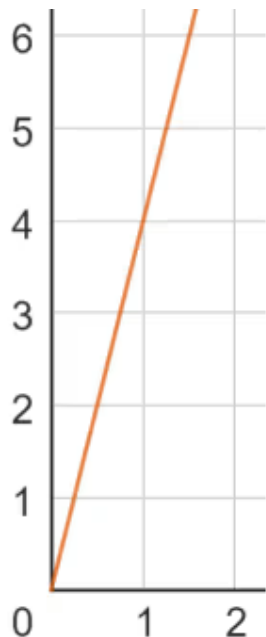

A	B
20	5
5	1.25

☒

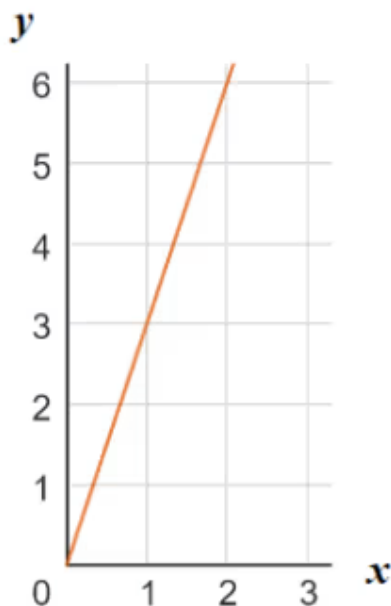

A	B
3	24
7	63

☐

- 4 The constant of proportionality represented by this graph is 4. Fill in the blank

- 5 Which of the following is NOT true of this graph? Tick 2 correct answers

- ☐ The constant of proportionality is 3.
- ☒ The equation of the line is $x = 3y$.
- ☐ The gradient of the line is 3.
- ☐ The graph has an intercept of zero.
- ☒ The graph does not show a directly proportional relationship.

6 What are the key features of a graph showing direct proportion? Tick 2 correct answers

- ☐ It has a negative gradient.
- ☒ It has an intercept of zero.
- ☒ It has a constant positive gradient.
- ☐ The intercept can be 0.1
- ☐ It has a gradient of 0
