

Problem solving with percentages and proportionality

1 Two variables are inversely proportional if there is a constant multiplicative relationship between one variable and the reciprocal of the other. Fill in the blank

2 Which of the following is a graph representing inverse proportion? Tick **1** correct answer

☐

☒

☐

☐

3 Which of the following situations illustrate an inversely proportional relationship? Tick **3** correct answers

☐

The number of coaches needed for a school trip and the number of people.

☒

The time taken to to paint a wall and the number of people painting.

☐

The number of pounds and the number of dollars exchanged.

☒

The time taken to drive to Liverpool and speed of the car.

☒

Number of buckets needed to fill a paddling pool and the size of the buckets.

4 A and B are inversely proportional. The missing value is 21. Fill in the blank

A	B
12	7
4	

- 5 A and B are inversely proportional. The missing value is 10. Fill in the blank

A	B
4	12
4.8	

- 6 It takes 3 people 4 days to build a wall. It should take 2 people 6 days to build the same wall. Fill in the blank
