

Scaling diagrams for multiplicative relationships

1 Proportion is a part to whole comparison. If two things are proportional then the ratio of part to whole is maintained and the _____ relationship between parts is also maintained. Tick **1** correct answer

- ☐ additive
- ☐ divisive
- ☐ multiplicative
- ☐ subtractive

2 Which of these diagram types give a good representation of a proportional relationship? Tick **4** correct answers

- ☐ Bar models
- ☐ Calculators
- ☐ Double number lines
- ☐ Graphs
- ☐ Ratio tables

3 85% of 40 is _____. Fill in the blank

4 Match each percentage of a number with its answer. Write the correct letter in each box

a	20% of 590
b	30% of 640
c	35% of 1200
d	45% of 200
e	1% of 8000

	90
	80
	192
	118
	420

- 5 Using this ratio table, work out 99% of 860. Fill in the blank

Amount	%
860	100%
86	10%
8.6	1%

- 6 Match the start of each statement to its correct conclusion. Write the correct letter in each box

a	A double number line and graph are
b	A ratio table is a
c	A bar model is a
d	A double number line and graph must
e	A ratio table must

	start from 0 on the axes.
	have a constant multiplier between columns or rows.
	concise and neat way to show proportion.
	good visual representation, but it takes time to draw the bars.
	good visual representations but must be scaled.
