

Scaling diagrams for multiplicative relationships

1 Proportion is a part to whole comparison. If two things are proportional then the ratio of part to whole is maintained and the _____ relationship between parts is also maintained. Tick **1** correct answer

- ☐ additive
- ☐ divisive
- ☒ multiplicative
- ☐ subtractive

2 Which of these diagram types give a good representation of a proportional relationship? Tick **4** correct answers

- ☒ Bar models
- ☐ Calculators
- ☒ Double number lines
- ☒ Graphs
- ☒ Ratio tables

3 85% of 40 is 34. Fill in the blank

4 Match each percentage of a number with its answer. Write the correct letter in each box

a	20% of 590
b	30% of 640
c	35% of 1200
d	45% of 200
e	1% of 8000

d	90
e	80
b	192
a	118
c	420

- 5 Using this ratio table, work out 99% of 860. Fill in the blank

Amount	%
860	100%
86	10%
8.6	1%

851.4

- 6 Match the start of each statement to its correct conclusion. Write the correct letter in each box

a	A double number line and graph are
b	A ratio table is a
c	A bar model is a
d	A double number line and graph must
e	A ratio table must

d	start from 0 on the axes.
e	have a constant multiplier between columns or rows.
b	concise and neat way to show proportion.
c	good visual representation, but it takes time to draw the bars.
a	good visual representations but must be scaled.
