

Name: _____

Expressing one number as a percentage of another

Task A: Writing any fraction as a percentage

- 1) Only shade in the equivalent percentages of the following fractions.

$\frac{1}{4}$	$\frac{1}{5}$
$\frac{9}{20}$	$\frac{7}{100}$
$\frac{11}{25}$	$\frac{11}{20}$
$\frac{1}{10}$	$\frac{7}{25}$
$\frac{31}{200}$	$\frac{3}{20}$
$\frac{15}{200}$	$\frac{63}{100}$

25%	20%	5%	31%	11%	15%
10%	20%	17%	5%	15.5%	17%
2%	8%	13%	7%	8%	5%
31%	4%	45%	14%	6%	8%
29%	28%	23%	11%	44%	55%
10%	21%	59%	3%	7.5%	63%

- 2) Convert the following fractions into a percentage. Give your answers correct to 1 decimal place if needed.

a) $\frac{3}{5}$

b) $\frac{7}{20}$

c) $\frac{1}{8}$

d) $\frac{1}{11}$

Task B: Writing any number as a percentage of another

1) Work out the following, giving your answer to 2 d.p. where appropriate:

- a) 21 as a percentage of 25
- b) 60 as a percentage of 80
- c) 84 as a percentage of 240
- d) 81 as a percentage of 240
- e) 37 as a percentage of 60
- f) 19 as a percentage of 40

2) Laura is ill and misses her first day of school.

- a) What is her percentage attendance after day one?

Laura is better the next day and attends school.

- b) What is her percentage attendance after day two?

Laura attends the rest of that week and all of the next week.

- c) What is her percentage attendance after day five?
- d) What is her percentage attendance after day ten?

Laura says that she will need to attend every day for the rest of the year to get 100% attendance.

- e) Is Laura correct? Why or why not?
